Paper 1 Multiple Choice

**October/November 2008**

**45 minutes**

Additional Materials: Multiple Choice Answer Sheet  
Soft clean eraser  
Soft pencil (type B or HB is recommended)

**READ THESE INSTRUCTIONS FIRST**

Write in soft pencil.

Do not use staples, paper clips, highlighters, glue or correction fluid.

Write your name, Centre number and candidate number on the Answer Sheet in the spaces provided unless this has been done for you.

There are **forty** questions on this paper. Answer **all** questions. For each question there are four possible answers **A, B, C** and **D**.

Choose the **one** you consider correct and record your choice in **soft pencil** on the separate Answer Sheet.

**Read the instructions on the Answer Sheet very carefully.**

Each correct answer will score one mark. A mark will not be deducted for a wrong answer.

Any rough working should be done in this booklet.

A copy of the Periodic Table is printed on page 20.

This document consists of **18** printed pages and **2** blank pages.

1 Diagram 1 shows the paper chromatogram of substance X.

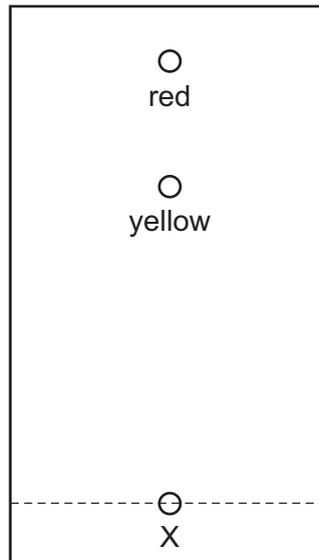

diagram 1

Diagram 2 shows the cooling curve for substance Y.

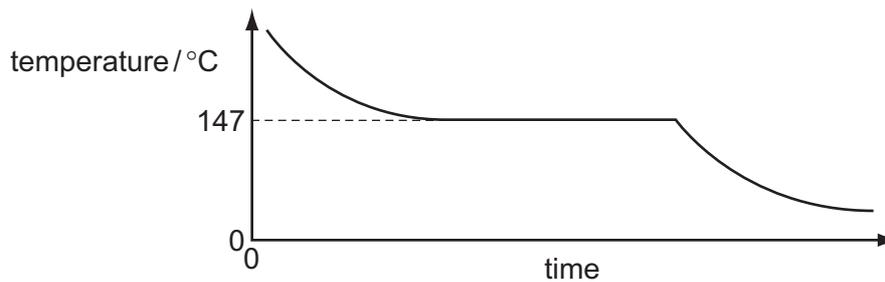

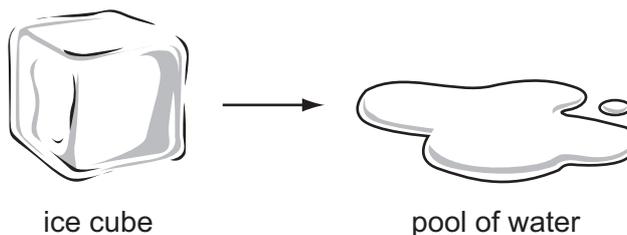

diagram 2

Which statement about X and Y is correct?

- A** X is a mixture and Y is a pure substance.
- B** X is a pure substance and Y is a mixture.
- C** X and Y are mixtures.
- D** X and Y are pure substances.

- 2 An ice cube melts.

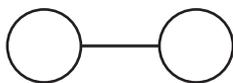

What happens to the molecules of water in the ice cube?

- A** They condense.  
**B** They dissolve.  
**C** They gain energy.  
**D** They lose energy.
- 3 Element Q has a nucleon number of 11. Its atoms each have six neutrons in the nucleus.

In which Group of the Periodic Table is element Q?

- A** I                      **B** II                      **C** III                      **D** V
- 4 Which two substances conduct electricity?
- A** brass (an alloy) and hydrogen chloride  
**B** hydrogen chloride and solid potassium iodide  
**C** solid potassium iodide and concentrated hydrochloric acid  
**D** concentrated hydrochloric acid and brass

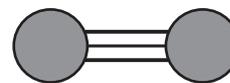

- 5 The diagrams show the bonding in three covalent molecules.

1

2

3

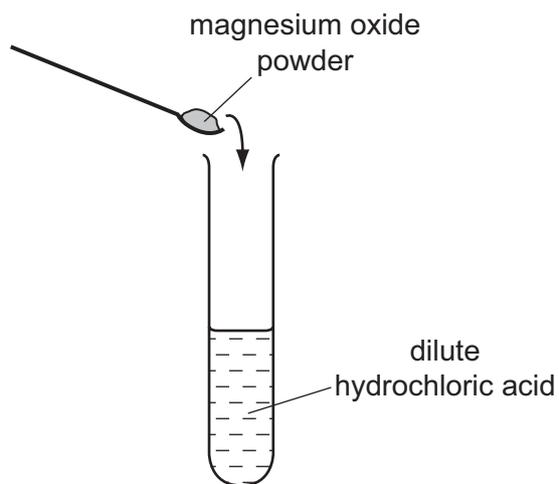

Which of these molecules combine to form ammonia?

- A** 1 and 2 only  
**B** 1 and 3 only  
**C** 2 and 3 only  
**D** 1, 2 and 3

6 Which substance does **not** require oxygen in order to produce energy?

- A coal
- B hydrogen
- C natural gas
- D  $^{235}\text{U}$

7 The diagram shows an experiment.

The temperature of the resulting solution is higher than that of the acid.

Which terms describe the reaction?

- A endothermic and neutralisation
- B endothermic and oxidation
- C exothermic and neutralisation
- D exothermic and oxidation

- 8 The oxides of two elements, X and Y, are separately dissolved in water and the pH of each solution tested.

oxide tested	pH of solution
X	1
Y	13

Which information about X and Y is correct?

	oxide is acidic	oxide is basic	metal	non-metal
<b>A</b>	X	Y	X	Y
<b>B</b>	X	Y	Y	X
<b>C</b>	Y	X	X	Y
<b>D</b>	Y	X	Y	X

- 9 Carbon dioxide is produced when dilute hydrochloric acid reacts with

- A** bauxite.
- B** graphite.
- C** limestone.
- D** rust.

- 10 Aqueous ammonia is added to a solution of a metal sulphate.

A green precipitate that is insoluble in excess of the aqueous ammonia forms.

Which metal ion is present?

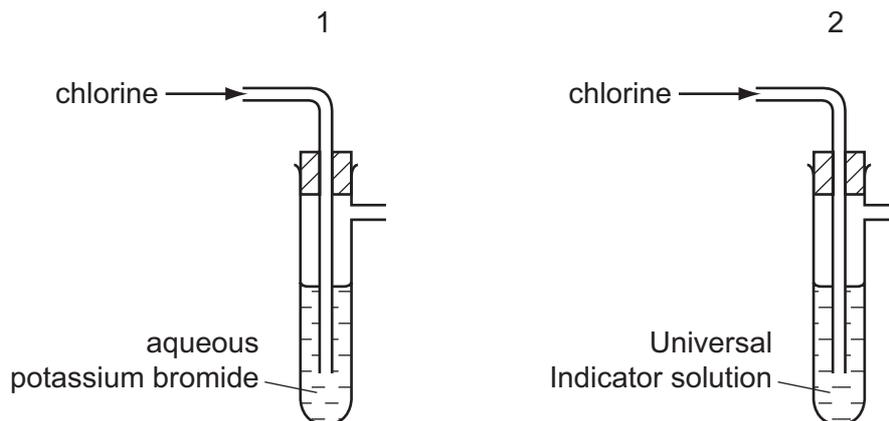

- A**  $\text{Cu}^{2+}$
- B**  $\text{Fe}^{2+}$
- C**  $\text{Fe}^{3+}$
- D**  $\text{Zn}^{2+}$

- 11 The element technetium, Tc (proton number 43), does not exist in nature.

From its position in the Periodic Table, which description of technetium is most likely to be correct?

- A** It is a brittle solid of low melting point.
- B** It is a metal with a high melting point.
- C** It is a soft, very reactive metal.
- D** It is an unreactive gas.

12 The diagrams show apparatus used to test the reaction of chlorine with different liquids.

In which test-tubes is an orange-brown colour produced?

- A both 1 and 2
- B 1 only
- C 2 only
- D neither 1 nor 2

13 The diagram shows part of the Periodic Table.

1 <b>H</b> Hydrogen 1
--------------------------------

7 <b>Li</b> Lithium 3	9 <b>Be</b> Beryllium 4
23 <b>Na</b> Sodium 11	24 <b>Mg</b> Magnesium 12

11 <b>B</b> Boron 5	12 <b>C</b> Carbon 6	14 <b>N</b> Nitrogen 7	16 <b>O</b> Oxygen 8	19 <b>F</b> Fluorine 9	20 <b>Ne</b> Neon 10
27 <b>Al</b> Aluminium 13	28 <b>Si</b> Silicon 14	31 <b>P</b> Phosphorus 15	32 <b>S</b> Sulphur 16	35.5 <b>Cl</b> Chlorine 17	40 <b>Ar</b> Argon 18

4 <b>He</b> Helium 2
-------------------------------

key

a <b>X</b>
b

- a = relative atomic mass
- X** = atomic symbol
- b = proton (atomic) number

At room temperature

- 1 all the metals shown are solid.
- 2 none of the non-metals shown is liquid.

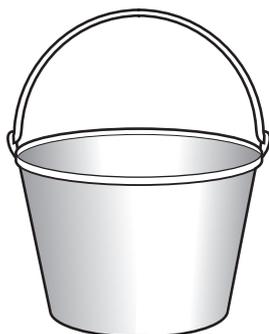

Which of these statements are correct?

- A both 1 and 2
- B 1 only
- C 2 only
- D neither 1 nor 2

14 Which of the oxides CuO, MgO and Na<sub>2</sub>O can be reduced by heating with carbon?

- A CuO only
- B MgO only
- C Na<sub>2</sub>O only
- D CuO, MgO and Na<sub>2</sub>O

15 The diagrams show two items that may be found in the home. Each item contains zinc.

galvanised bucket

brass door-knocker

In which items is the zinc used as an alloy?

	bucket	door-knocker
<b>A</b>	✓	✓
<b>B</b>	✓	x
<b>C</b>	x	✓
<b>D</b>	x	x

16 Sodium chloride is mined from underground rock salt by using hot water.

Which term describes the use of water in this process?

- A electrolyte
- B filtrate
- C solute
- D solvent

17 What is acetylene used for?

- A as a fuel for aircraft
- B as a fuel for welding
- C for filling electric lamps
- D for filling weather balloons

18 Which compound would **not** be an important part of a garden fertiliser?

- A  $\text{Ca}_3(\text{PO}_4)_2$       B  $\text{KNO}_3$       C  $\text{Mg}(\text{OH})_2$       D  $(\text{NH}_4)_2\text{SO}_4$

19 Which of bromine and steam can react with ethene?

	bromine	steam
<b>A</b>	✓	✓
<b>B</b>	✓	x
<b>C</b>	x	✓
<b>D</b>	x	x

20 An addition polymer consists of a long chain of monomer units.

What are the names of the polymer and monomer?

	polymer	monomer
<b>A</b>	poly(ethane)	ethane
<b>B</b>	poly(ethane)	ethene
<b>C</b>	poly(ethene)	ethane
<b>D</b>	poly(ethene)	ethene

- 21 Two digital stopwatches X and Y, which record in minutes and seconds, are used to time a race. The readings of the two stopwatches, at the start and at the end of the race, are shown.

	start	end
X	00:00	00:40

	start	end
Y	01:30	02:20

Which statement about the time of the race is correct?

- A Both stopwatches recorded the same time interval.
  - B Stopwatch X recorded 10 s longer than stopwatch Y.
  - C Stopwatch Y recorded 10 s longer than stopwatch X.
  - D Stopwatch Y recorded 50 s longer than stopwatch X.
- 22 A car travels at various speeds during a short journey.

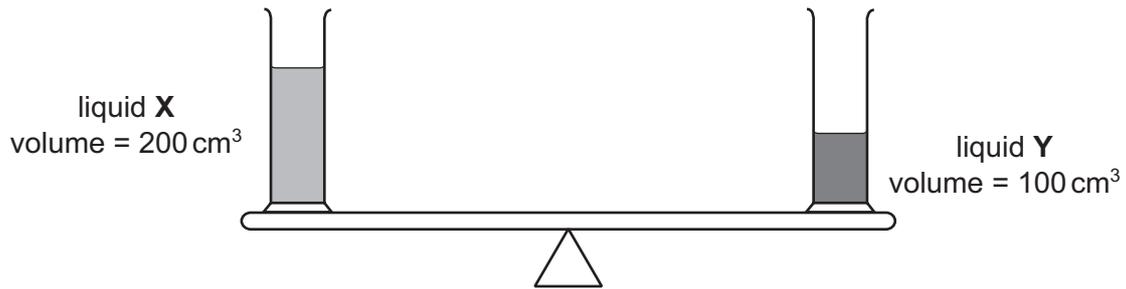

The table shows the distances travelled and the time taken during each of four stages P, Q, R and S.

stage	P	Q	R	S
distance travelled / km	1.8	3.6	2.7	2.7
time taken / minutes	2	2	4	3

During which two stages is the car travelling at the same speed?

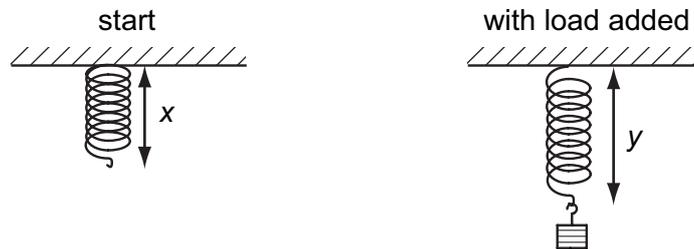

- A P and Q
- B P and S
- C Q and R
- D R and S

- 23 Two identical measuring cylinders containing different liquids are placed on a simple balance. They balance as shown.

How does the density of X compare with the density of Y?

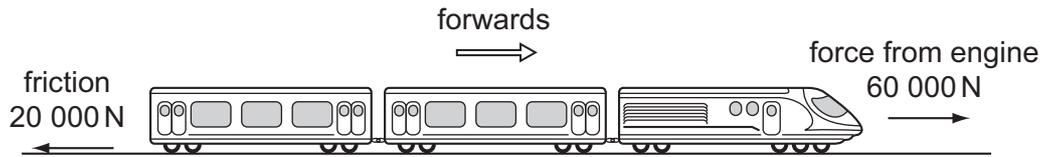

- A density of X =  $\frac{1}{2}$  × density of Y
- B density of X = density of Y
- C density of X = 2 × density of Y
- D density of X = 4 × density of Y
- 24 A student carries out an experiment to plot the extension-load graph for a spring. The diagrams show the apparatus at the start of the experiment and with a load added.

What is the extension caused by the load?

- A x                      B y                      C  $y + x$                       D  $y - x$

- 25 A train is travelling along a horizontal track at constant speed. Two of the forces acting on the train are shown in the diagram.

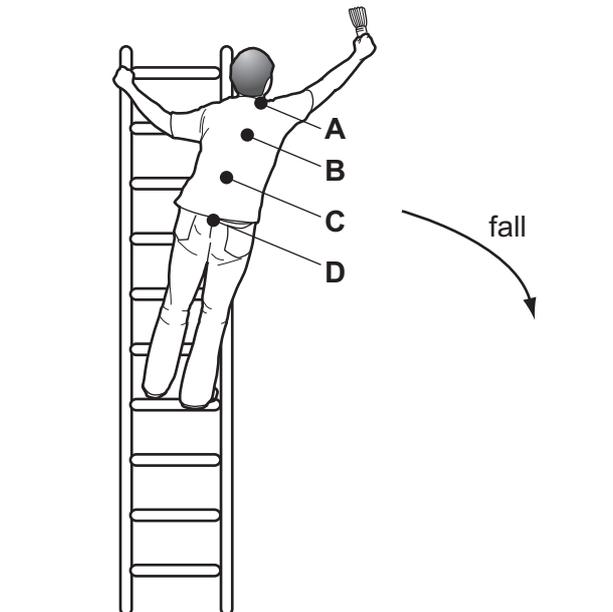

A force of air resistance is also acting on the train to give it a resultant force of zero.

What is this air resistance force?

- A 40 000 N backwards
  - B 80 000 N backwards
  - C 40 000 N forwards
  - D 80 000 N forwards
- 26 A man is standing on a ladder painting a wall. He leans over too far and the ladder starts to fall.

The diagram shows his position just before the ladder starts to fall.

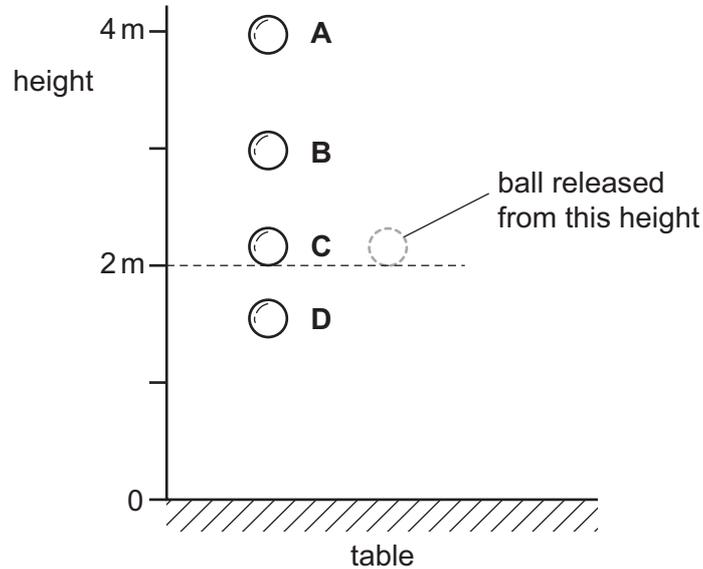

At which point is the combined centre of mass of the man and the ladder?

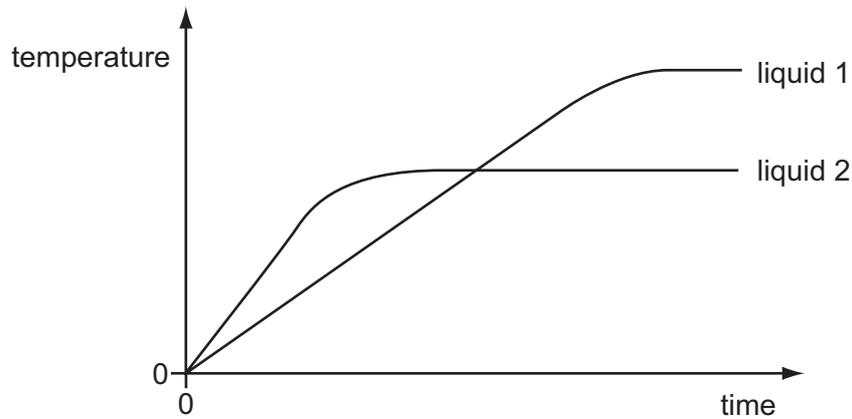

27 A rubber ball is dropped from a height of 2 metres onto a table.

Whilst in contact with the table, some of its energy is converted into heat energy.

What is the highest possible point the ball could reach after bouncing?

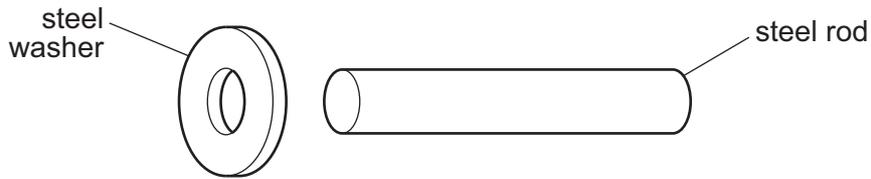

28 Equal masses of two different liquids are heated using the same heater. The graph shows how the temperature of each liquid changes with time.

What does the graph tell us about the liquids?

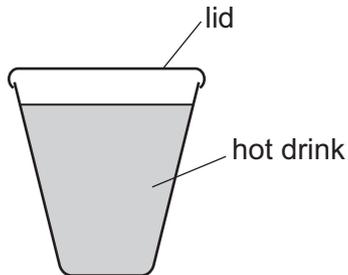

- A Liquid 1 has a higher melting point than liquid 2.
- B Liquid 1 has a higher boiling point than liquid 2.
- C Liquid 1 starts to melt sooner than liquid 2.
- D Liquid 1 starts to boil sooner than liquid 2.

- 29 An engineer wants to fix a steel washer on to a steel rod. The rod is just too big to fit into the hole of the washer.

How can the engineer fit the washer onto the rod?

- A Cool the washer and put it over the rod.
  - B Cool the washer and rod to the same temperature and push them together.
  - C Heat the rod and then place it in the hole.
  - D Heat the washer and then place it over the rod.
- 30 A white plastic lid is placed on a plastic cup used for a hot drink.

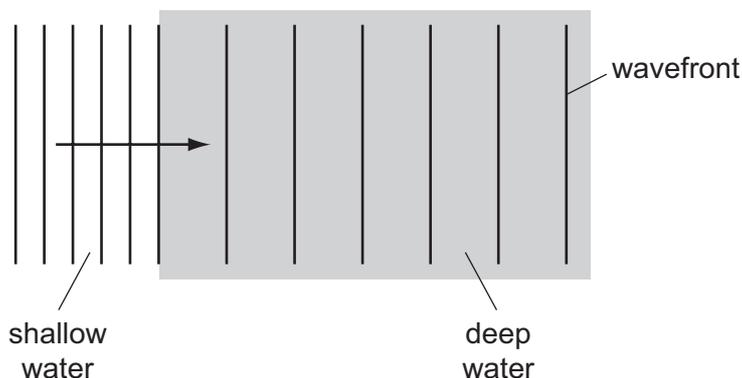

This would have no effect on the loss of heat by

- A conduction.
- B convection.
- C evaporation.
- D radiation.

31 Waves in a tank pass from shallow to deep water.

The wavefront diagram is shown.

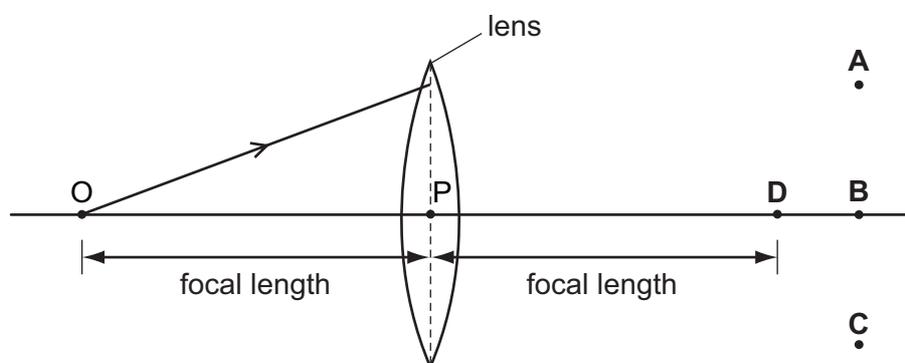

Which quantity increases as the waves enter the deep water?

- A amplitude
- B frequency
- C wave energy
- D wavelength

32 In the diagram, the distance OP is the focal length of the lens.

Through which point will the ray shown pass, after refraction by the lens?

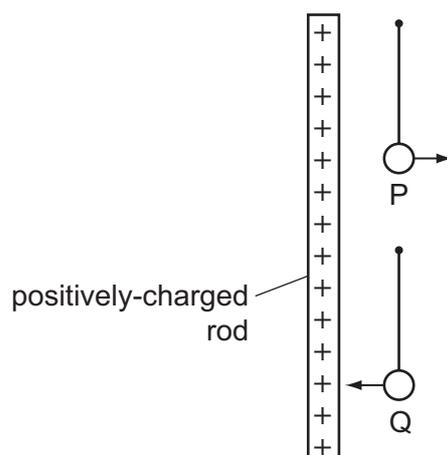

33 Two metal bars are held together. At least one of the bars is a magnet. The bars repel each other.

What does this show about the bars and why?

	what it shows	why
A	only one of the bars is a magnet	two magnets always attract each other
B	only one of the bars is a magnet	induced magnetism in the other bar makes it repel
C	they are both magnets	there must be like poles facing each other
D	they are both magnets	there must be opposite poles facing each other

- 34 Two charged balls P and Q are hung, one above the other, from nylon threads. When a positively-charged plastic rod is placed alongside them, P is repelled and Q is attracted.

What are the charges on P and on Q?

	charge on P	charge on Q
<b>A</b>	negative	negative
<b>B</b>	negative	positive
<b>C</b>	positive	negative
<b>D</b>	positive	positive

- 35 The table shows the voltage and current ratings for four electric heaters.

Which heater has the least resistance?

	voltage / V	current / A
<b>A</b>	110	5.0
<b>B</b>	110	10.0
<b>C</b>	230	5.0
<b>D</b>	230	10.0

36 In the circuit below, X and Y are identical 6 V lamps.

What happens when the switch is closed (switched on)?

- A X lights more brightly than Y.
  - B Y lights more brightly than X.
  - C X and Y both light with full brightness.
  - D X and Y both light with half brightness.
- 37 A beam of cathode rays passes through an electric field between charged parallel plates.

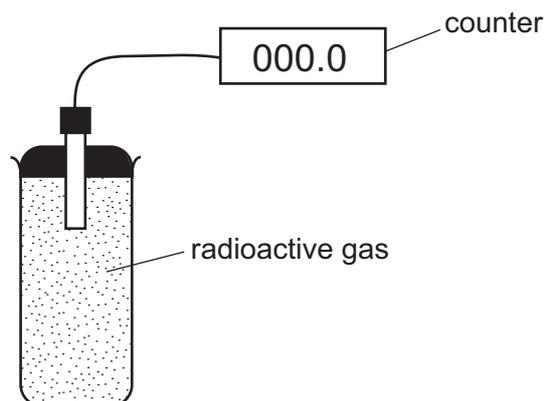

In which direction is the beam deflected?

- A towards the negative plate
- B towards the positive plate
- C into the page
- D out of the page

38 Which material is commonly used as a lining for a box for storing radioactive samples?

- A aluminium
- B copper
- C lead
- D uranium

39 The diagram shows an experiment to monitor the radiation from a radioactive gas. The counter readings are corrected for background radiation.

The table shows how the counter reading varies with time.

time / seconds	0	20	40	60	80	100	120	140	160	180
counter reading / counts per minute	140	105	82	61	44	36	27	20	15	10

What is the half-life of the gas?

- A between 20 and 40 seconds
- B between 40 and 60 seconds
- C between 60 and 140 seconds
- D between 140 and 180 seconds

40 A uranium nuclide  $^{238}_{92}\text{U}$  emits an  $\alpha$ -particle.

What are the new nucleon and proton numbers?

	nucleon number	proton number
A	238	88
B	236	90
C	234	92
D	234	90

The volume of one mole of any gas is 24 dm<sup>3</sup> at room temperature and pressure (r.t.p.).

Permission to reproduce items where third-party owned material protected by copyright is included has been sought and cleared where possible. Every reasonable effort has been made by the publisher (UCLES) to trace copyright holders, but if any items requiring clearance have unwittingly been included, the publisher will be pleased to make amends at the earliest possible opportunity.

University of Cambridge International Examinations is part of the Cambridge Assessment Group. Cambridge Assessment is the brand name of University of Cambridge Local Examinations Syndicate (UCLES), which is itself a department of the University of Cambridge.
